**Re: RCRA Documentation of Responsible Parties and Continuing Discharge  
Sources at CPS/Madison NPL Site**

Dear John:

I am writing to advise you of an issue of concern that has been raised by the City in connection with the ongoing operations of Madison Industries. As you may recall, at our August 8, 1995 meeting in Edison, the City requested its concern that there be coordination between the Superfund and RCRA activities at the Site. The City is concerned that the ongoing operations of Madison, as reflected in the RCRA inspection reports, indicate that there are continuing discharges from the Madison operation. Numerous documents contained in the RCRA files have been examined by the City and are reflected in a letter to me from the City's Engineering Consultant, Fletcher N. Platt, Jr., of Killam Associates, dated April 22, 1996.

As you may know, the Industries have submitted their Phase II Remedial Investigation Reports and the State has responded to those reports. The City is concerned that the Remedial Investigation must take into consideration all of the information that is being generated in the RCRA files. While the April 22, 1996 letter is limited to the RCRA information concerning Madison, our concerns apply also to CPS which is a RCRA facility. We would appreciate being advised as to how the agency will be incorporating the RCRA information into the ongoing investigation of the site. Please be advised that we have provided a copy of this submission to Charles Licata and Paul Harvey of NJDEP.
